

## ВЕДОМ

Technical drawing of a power line layout. The drawing shows a 110 kV line (ВЛ 110 кВ) running diagonally across the top. A 10 kV line (ВЛ 10 кВ) branches off from it, passing through a transformer (Т) and a switch (В). A 0.4 kV line (ВЛ 0,4 кВ) branches off from the 10 kV line, passing through a transformer (Т) and a switch (В). A central building (1) is shown with dimensions 13.50m by 14.00m. The drawing includes various electrical components like transformers, switches, and insulators, along with elevation points and coordinate markers.
